

# PRODUCT FEATURES – *Downloading the Dictionaries (Android view)*

To activate the the in-built dictionary functionality you need to download the content. Open up a book nd tap the search button (magnifying glass). You end up in the “search box” – select and tap “Dictionaries.” A notification will come up asking if you want to download the dictionaries. Say “yes”.

# PRODUCT FEATURES – *Downloading the Dictionaries II (Android)*

Three dictionaries will now appear: Nursing, Medicine and Dentistry. All three will have a “free” button next to them - choose which dictionaries you want and hit that button – In this screenshot I have selected the Nursing and the Medicines Dictionary. Once downloaded, the dictionary will show up in your “Library” (“Local”) on Android as “Dictionary Search” - tap the icon and end up in the ‘search box’ with dictionaries pre-selected.
